

## Enterprise Offering

*You work for a large organisation that uses Business World and you're looking for a streamlined way to support employees on a software system that's used across the entire enterprise - delivering the knowledge they need, when they need it.*

Agilyx Training offers a wide range of solutions from empowering your employees to have more autonomy in their onboarding and learning to futureproofing your organisation.

Onboard all of your new employees as efficiently as possible. Self-service online learning bundles enable your new staff to learn how to use Business World quickly and efficiently in their own time – with minimal input from managers or Human Resources. New staff are empowered to self-manage and navigate within the courses, helping them get straight to the knowledge they need for their role.

Futureproof your enterprise by maintaining organisational knowledge and avoid losing vital knowledge about your system and its functionality when key professional users leave your organisation. Through comprehensive learning bundles of online courses for each organisational role, as well as the opportunity for tailored supplementary sessions – you can ensure your continued organisational competency.

Whether you need to empower employees to be more autonomous through self-service or want to futureproof your organisation, Agilyx Training can help.

## Benefits

### A Gold Standard Training Database

Effective training needs an effective database. Completely configured and integrated with all our training materials, the Agilyx Training Database is the ultimate guarantee of a streamlined and satisfying training experience.

### Learning App

Our mobile learning is all about a philosophy of accessible and versatile learning.

With minimal downtime, our training portals are available around the clock. So whether you're from Melbourne, Mumbai, or Manchester, you're covered!

### Micro

Research is showing that we best learn new skills in small bite-sized bits that are absorbable and easy to build on. Our e-learning materials have a mix of media, pace and timing in order to activate more of the brain's capacity to learn and cater to a variety of learning styles.

### Modular

Our modular learning approach is built on practicality. It enables you to learn at your own pace and create a learning pathway that best suits your needs. All the courses have been designed to work independently so you can also move easily between each of the course elements – you don't have to sit through what doesn't fit your needs.

### Mobile

We use TalentLMS as our learning platform to access our business training on-the-go. As long as you're connected to the internet, you can pick up where you left off anytime, anywhere.
